The beauty of Consort *fs* goes far beyond its striking good looks

Incorporating all the best features of PVCu, the Consort *fs* integrated system is the latest generation 70mm lead-free profile, combining the best of style and performance. Proving that beauty can be more than just skin deep, this innovative profile, which has the highest attainable BSI Class 'A' specification, combines strength and value for money with a truly elegant sculptured appearance, following the lines of many timber designs.

Available in a full range of sizes, all with totally integrated system features, the Consort *fs* range will revolutionise the way you think about windows and doors.

This brochure features our comprehensive range of domestic door products. A fantastic range of choice and styles from traditional front and back doors to ultra-wide bi-fold doors to let your garden become part of your living area.

- » Environmentally friendly lead-free 70mm profiles
- » Internally glazed for extra security and ease of unit replacement
- » BSI Class 'A' specification profiles (highest attainable)
- » Secured by Design. POLICE PREFERRED SPECIFICATION*
- » Made to BSI specification
- » Available in a vast array of coloured foils and woodgrains, as well as all white

*Subject to specification.

Residential doors

Fully Sculptured Profile

- » Secured by Design – POLICE PREFERRED SPECIFICATION if requested
- » Alternative sizes of outer frame and transom/mullion available
- » Ideal in both domestic and commercial applications, including sheltered housing
- » Available in single or double, sidelights and fanlight combinations
- » 70mm front-to-back multi-chambered profiles
- » Available inward or outward opening
- » Available internally beaded
- » Available in white, Chartwell green, black, grey, cream, rosewood, oak, Irish oak and foiled white in standard lead time. Available in other foils with extended lead time

French doors

Fully Sculptured Profile

- » Alternative sizes of outer frame and transom/mullion available
- » Slimline profile
- » 70mm front-to-back multi-chambered profiles
- » Locking mechanism – Master: two hooks, two rollers, two shoot bolts, latch and deadbolt; Slave: handle operated, two shoot bolts
- » Available inward or outward opening
- » Available internally beaded
- » Available in all white, rosewood and oak in standard lead time.
Available in other foils with extended lead time

Patio doors

Fully Sculptured Profile

Today the modern family home is all about open plan, with living, dining and kitchen spaces all merging into one.

Sliding patio doors that open onto the garden create indoor / outdoor living at its best. When closed you maximise an uninterrupted view of the outside world, while staying warm and cosy. When open you let the summer in as you seamlessly increase your living space as home and garden become one.

- » Sculptured or chamfered bead
- » Extra durability for weathering
- » Stainless steel wheels ensure a smooth operation, moving with minimal effort
- » High security
- » Large units easily achieved
- » Outer frames can be welded or mechanically jointed
- » Low threshold option available
- » A wide range of colour options available

Tilt & slide patio doors

Fully Sculptured Profile

- » Alternative sizes of outer frame available
- » An ideal door for many different types of installation from high-rise blocks to domestic houses
- » Available in a full range of styles and sizes including combinations of fixed and opening lights
- » Features include the ventilation benefits while in the tilt position
- » 70mm front-to-back multi-chambered profiles
- » Available in a vast array of coloured foils and woodgrains as well as all white

Stable doors

Fully Sculptured Profile

- » 'Traditional' stable door in PVCu
- » Top and bottom sections both lock
- » Available inward or outward opening
- » Low threshold
- » Multipoint locking system
- » Low-maintenance
- » Available in a vast array of coloured foils and woodgrains as well as all white

Bi-folding doors

Fully Sculptured Profile

Blurring the lines between where the home ends and the garden begins, our range of bi-folding doors creates a versatile new living space that fills your home with a unique sense of light and space. In summer cast them wide open to let the fresh air in, and in winter seal them tight and cosy up in the warmth without losing your stunning view.

Bi-folding doors are a stunning alternative to french or patio doors and can be installed so that the doors sit inside or outside of the property when folded back. Engineered with such precision, they glide smoothly back and forth with only the lightest of touch. Secured when closed by our extremely advanced multi-locking system.

Of course, as well as being a beautiful way to bridge the gap between your home and garden, they can also be used to separate rooms within your home, creating a truly unique and adaptable space.

- » Highest DSER 'A' energy efficiency rating
- » Sixteen door style configurations
- » Sash width of up to 1 metre
- » Up to 6 metres wide
- » Three thresholds available: standard, low and ultra-low for interior use
- » Fully adjustable hinges
- » Reversible guide wheels
- » Huge range of colours and woodgrains available

* Subject to specification.

Colour options

Introduce a whole new dimension

A whole new dimension has now been added to the already sleek and truly elegant appearance of the Consort range of doors... COLOUR! So why not add something a little different and bring colour back to your home.

- » Externally – a slightly textured, coloured foil giving the effect of painted wood
- » Internally – clean white profile
- » Available in a vast array of colours and woodgrains
- » Also available in all white, oak and rosewood effect, which can be specified both internally and externally

Virtually fade-free, with a 10-year adhesion guarantee, this highly durable finish will not crack, flake or peel as it retains sufficient flexibility to move with the material to which it is applied.

Thoroughly tested throughout Europe for over 10 years, this advanced, UV-stable colour system has proven resistance to all weather conditions, including salt water.

Colours shown are VEKA Matrix Fully Sculptured – ex-stock colour availability.

Hardware range

Add something a little different

Hardware may be the last thing fitted, but it's the part we most frequently touch and the aspect by which we judge overall quality.

You need to be confident that all handles, locks and hinges meet agreed standards for safety, reliability and quality besides complementing the overall look and design of your new doors.

SupaSecure™ door handle

- » Anti-grip chamfered backplate shoulders provide mole-grip resistance
- » Concealed steel reinforcement provides anti-jemmy resistance
- » Anti-drill rotating disc shields the cylinder from attack, preventing a drill bit from penetrating the cylinder
- » Anti-snap integrated cylinder guard encasing the cylinder as added protection
- » Backplate features an integrated spring mechanism to ensure lever returns consistently to 90° avoiding any 'handle sag'
- » Durability and corrosion-resistance tested to BS EN 1906: grade 4
- » Secured by Design accredited, SBD logo etched onto external backplate as a visual deterrent
- » BSI 2 Star Kitemark accredited
- » Available in white, black, gold, silver and brushed silver

Supa™ door handle

- » Backplate features an integrated spring mechanism to ensure lever returns consistently to 90° avoiding any 'handle sag'
- » Durability and corrosion-resistance tested
- » Available in white, black, gold, silver and brushed silver

Knockers

- » Designed to compliment the features of any external door
- » Available in contemporary and traditional styles with or without spyholes
- » Salt spray tested to 240 hours for plated finishes and 480 hours for painted finishes
- » Available in white, black, gold, silver and brushed silver

Letterplates

- » Colour-matched frame and flap manufactured from zinc
- » Concealed flap-operating mechanism – patented design
- » Internal and external thumb access for ease of use
- » Both external and internal flaps open to 180° when fully open without over-stressing
- » Independently tested to 50,000 cycles for operational reliability
- » Independently salt spray tested to 240 hours for plated finishes and 480 hours for powder coated finishes for corrosion-resistance
- » Available in white, black, gold, silver and brushed silver

Escutcheons

- » Manufactured from 304 stainless steel, suitable for coastal regions and areas of high pollution
- » Suitable for use with all euro cylinders
- » Salt spray tested to 480 hours for proven weather-resistance
- » Available in three suited finishes

Door gearing

MultiSafe multi-point door locks are renowned for their ease of use, reliability and durability. Profile specific keeps ensure secure fastening to the outer frame.

Lever action is a very simple means of operating a door lock. When the door is unlocked by the cylinder, depress the lever to release all locking points. On closing, lift the lever to engage the main locking points then turn the key in the profile cylinder to throw the central deadbolt and to deadlock all other locking points.

Where security is a greater concern on main residential doors, the Secured by Design accredited FUHR 856 Type 3, with two hook bolts and two roller cams is recommended.

★★★ security cylinder

As well as being approved by the Police and achieving the highest Kitemark star rating, the ★★★ security cylinder is tested by locksmiths with the Master Locksmith Association and is accredited with their highest standard, Sold Secure Diamond.

★★★ security cylinders resist direct attack and offer a significant security upgrade to any door regardless of the material of the door and the handle.

SFS hinge

The Dynamic 2D hinge offers a traditional look and complete adjustability, with a high security and strong technical performance and reliability without compromising on aesthetics.

These hinges are robust enough to meet and exceed British Standard PAS 24 throughout the lifetime of the door and hold a 'Secured by Design' license. Available in six standard colours.
